DESCRIPTORS	*Animals; Audiovisual Aids; Instructional Materials; Learning Activities; *Preschool Education; Science Activities

ABSTRACT

Some preschool teachers have expressed concern regarding the lack of science instructional material for students age 2 through the preschool years. This videotape was developed to help fill this chasm in our educational system. It contains activities from students' everyday life such as eating, washing, and playing. These daily processes are then compared to a variety of animals going through the same simple processes. (ZWH)
